

Rechnen mit ganzen Zahlen

1. Addition ganzer Zahlen

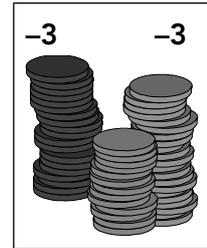

Stelle dir eine ganze Zahl als **Kontostand** vor.

Positive Zahl: Guthaben

Negative Zahl: Schulden

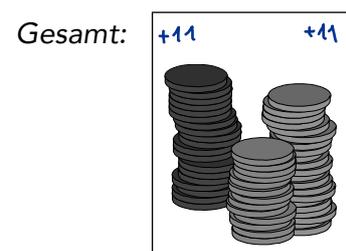

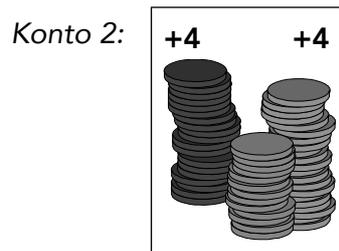

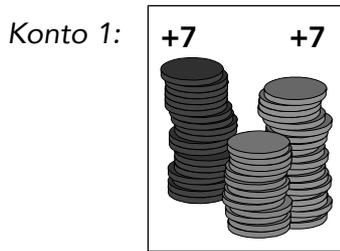

5 Guthaben

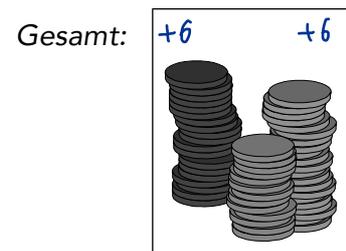

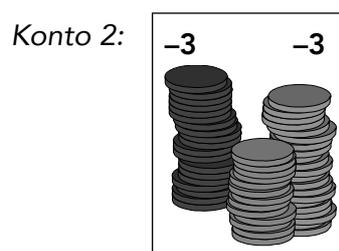

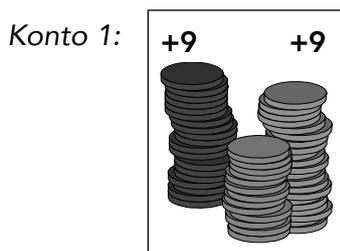

3 Schulden

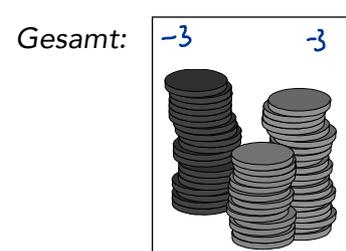

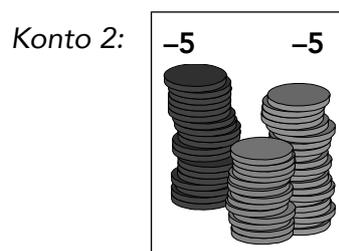

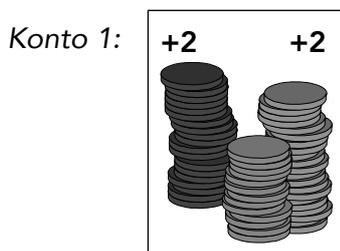

Berechne den Gesamtkontostand und schreibe die passende Rechnung auf:

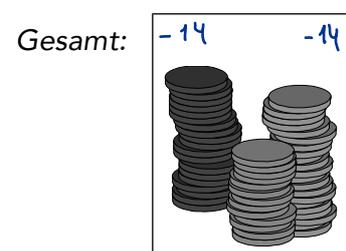

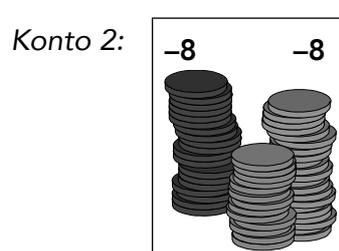

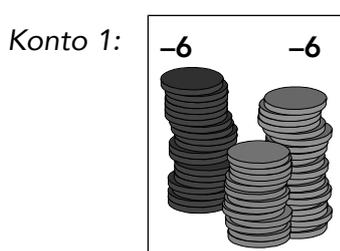

Rechnung: $(+7) + (+4) = +11$

Rechnung: $(+9) + (-3) = +6$

Rechnung: $(+2) + (-5) = -3$

Rechnung: $(-6) + (-8) = -14$
